Types of Installation

J-BOX mount

Is a standard installation type for the Round fixture. Each canopy set includes all the necessary hardware for j-box installation. The maximum length of the aircraft and power cables is 15 feet. Ideally fits on 3.5" and 4" octagon/square j-box.

T-Clip (for drop ceiling)

Is an optional hardware bracket for suspended ceilings that allows Round fixture suspension directly on the T-grid. T-clip fits on a 15/16" grid, and it comes as a set of two brackets per fixture.

T-Support (for drop ceiling)

Is an optional hardware bar for suspended ceilings installations that allows Round fixture suspension through the panels and between the T-grids. It is fully adjustable for symmetric/asymmetric fixture positioning.
